

WINTER GOODS! WINTER GOODS!

We have been busy this week unpacking the largest line of goods for winter that we have ever purchased. The line takes in

Suits for Men and Boys,
Overcoats for Men and Boys,
Underwear, Shoes, Stockings Etc.

We have the best line to select from in the city and have placed the prices where the goods will be sold.

H. LEWIS, THE ONE-PRICE CLOTHIER.

APPLES! APPLES!

We have just got a full car of choice apples for present use, they are very fine and very cheap (for this year). Call and see us on apples and we can do you good.

SPAFFORD & COLE.

HOW ABOUT A
GOOD SMOKE?
It may not have occurred to you that the
CITY DRUG STORE
is headquarters for fine domestic and Havana cigars, yet it is so. Here can be found the mild medium and strong smokes for men. None but the very best brands handled.

PRESCRIPTIONS CAREFULLY AND ACCURATELY COMPOUNDED.

F. E. KRETLOW, Pharmacist.

HEATING STOVES!

See the splendid display of Stoves for the cold weather that is beginning to be felt.

BIG STOVES, LITTLE STOVES
COAL STOVES, WOOD STOVES.

Lewis Hardware Co.

INSTITUTE A SUCCESS

Largest Attendance in History of the County—Catholic School Teachers Unite With the City Teachers.

A joint institute of the city and county teachers held at the High school rooms the 25th and 26th of September was the largest in point of attendance of any in the history of the county. The enrollment was 68 and the per cent. of attendance of those enrolled was 100. In addition to that the teachers from St. Mary's Parochial school were in attendance in addition to the regular enrollment. State Superintendent Chas. P. Cary of Madison was here the first day of the institute and gave a short address to which was paid particular attention. Throughout the institute the teachers in attendance showed great interest in the work and the interest was pleasing to the conductors in charge. Prof. J. W. Livingston of Stevens Point and V. E. McNeill of West Superior, the conductors, stated that the institute was one of the most interesting that they had held. Both gentlemen are Normal school superintendents and state institute conductors and rank among the first in the state.

The work of a kind and carried out was more on methods along academic lines, it being the intention of County Superintendent Mason to give this branch of institute work particular attention as the want of it had been noted from time to time in his travels about the county.

It is quite likely that there will be two more institutes held here in the county under the superintendent's direction before the year closes, there being plenty of funds at present to conduct another institute whenever it may be called.

The city teachers attended the institute in a body for the first time in the history of the county, acting upon the resolution of the city board of school directors, and their presence materially aided the work of the conductors. Superintendent Mason feels particularly gratified to the city school managers for their work in helping along a good cause.

BRICKLAYERS UNION ORGANIZED.

Organization Perfecting First of the Week—Object one of Protection.

A branch of the Bricklayers and Masons International Union of America was organized in this city last Saturday evening at the Macabee hall on Stevens street. The union is perfecting with membership of thirty bricklayers and masons many of whom are employed on the building of the new paper mill. Following are the officers:

Henry Beck—President.
Ed. Shepard—Vice President.
Case Smith—Financial Secretary.
Frank Goring—Corresponding Secretary.
H. J. Samways—Treasurer.

It is not the intention of the members to ask for a raise in wages but to work for the uniform scale now being paid throughout the country and in Rhinelander. One purpose of the union is to bar incompetent men from working with skilled labor. The next meeting will be held Saturday evening of this week by which time the charter will have been received and rules and by-laws adopted. It is expected that the organization will thrive and grow.

The Time Stopped Here.

Last Friday the supply of lime used in the building of the new paper mill ran low. A new supply had been ordered and was on the road, but several days would elapse before it would reach its destination, which would thus compel the masons and bricklayers employed on the mill to cease work until its arrival. R. F. Tompkins, the "X-ray" line agent at this point, learning of the difficulty, did an act which was highly appreciated by the contractor, Mr. Fride. That night Mr. Tompkins noticed among other things a carload of lime being from Minneapolis. He, after deliberation, ordered the car to be switched off at this station and immediately wired back to Minneapolis for a new carload of lime to be shipped to Minneapolis. The following morning the lime was switched over to the paper mill, much to the surprise and gratification of Mr. Fride.

The Gas Van Minstrels.

The Gas Van American Minstrel, one of the cleverest black face organizations on the road, will be the attraction at the Grand opera house Saturday evening, Oct. 3rd. It will prove a pleasant surprise to those who have attended minstrel shows here in the past and are fortunate enough to be able to attend the performance.

Owing to the fact that the company arrives here from Escanaba about 4 o'clock p. m. the street parade will not take place at noon as usual but will form at the Gas depot and proceed up town.

Prices 75, 50 and 25 cents. Tickets at C. A. Carling & Co.'s, opera house block.

Sun's Minstrels Saturday.

MAN IS KILLED AT GAZEN

John J. Johnson a Saloonkeeper at Gazen Is Murdered by Jerome Fry, a Railroad Section Boss.

A "hurry" call for medical aid was received here the first of the week from Gazen, a small station on the Soo and North-Western roads in the eastern part of the county, where it was reported that a man lay dying.

The bearer of the news, a Soo Line section foreman named Jerome Fry, gave himself up to the officers after informing them that J. J. Johnson, a saloonkeeper, was dead. He was taken in charge by Acting Coroner Mason and back to Rhinelander by that officer to give testimony at the inquest. Two inquests were held, the last taking in expert testimony as to the cause of death by Doctors Garner and Hogan whose services were required by the coroner. It developed that the man's skull had been fractured in two places, the fractures evidently having been caused by a fall as both were located at the back of the head and extended up toward the top of the skull. There were three contusions on top of the head, evidently made by a club or heavy stick but it was not thought that these in themselves would have been fatal.

The jury after viewing the remains rendered a verdict that the man "came to his death from the effects of a stroke or strokes from an ax handle in the hands of one, Jerome Fry, given during a fight in the saloon of said Johnson on the afternoon of Sept. 25, last."

From what can be learned the affair resulted during a quarrel over the payment of board by Johnson, Fry alleging that he had tried to collect the account but had always failed.

The saloon where the murder occurred presented a terrible sight as blood and matted hair were in plain evidence on the walls and floor.

Fry's preliminary hearing took place before Judge Browne and the case was continued until Oct. 3 at 10 o'clock a. m. He was remanded to jail until then.

Danger From Flying Rock.

The residents in the vicinity of the High school and adjacent streets are complaining loudly about the daily showers of rocks falling onto their premises from the blasting operations at the paper mill. There is talk of an appeal to the Mayor and City Council and the idea seems to be formulating to get out an injunction against the Construction Company.

It is claimed that children playing in their home yards and people about their residences are in danger of being killed outright when the heavy blasts are set off. Many narrow escapes from the falling rocks are cited and only yesterday an eight pound piece of granite came down from on high and crashed through the roof of a barn and into the hay mow where several children had but a few minutes before been playing. The people within the danger zone say they have been patient and stood it long as they think they ought to but they seem now in an ugly mood and in the interest of their lives purpose to make trouble for the Construction Company if it doesn't shoot the other way.

Shooting Affray at Mercer.

In a saloon row at Mercer Monday afternoon Wm. Volight shot and killed Sam Doucette. The weapon used was a Winchester rifle. Doucette died in the Ashland hospital where he had been taken for treatment, a few hours after, Volight is in jail at Hurley.

CORNER STONE IS LAID

Impressive Ceremonies Mark the Laying of Corner Stone for the Public Library Masonic Fraternity Officers.

In answer to invitations sent out by the Public Library Board a crowd of good size gathered at the corner of Stevens and Fifth streets last Saturday afternoon to witness, what to many were new, ceremonies commemorative of the building of our new library.

The arrangements were in charge of Rhinelander Lodge No. 212, F. & A. M., Judge S. H. Alban acting as Grand Master.

A platform had been constructed around the corner of the office where the stone was located and upon it and around it were stationed members of the brotherhood who held sacred the square and compass as an emblem.

The program of exercises was not extended but it will be remembered by all who were in attendance at the ceremonies. A brief address was made by the Grand Master which touched on the significance of the occasion especially as it affected the ancient fraternity of which he was a member. His remarks were most attentively listened to, the main thought in the discourse being that the deposits that were made in the corner stone would not be disturbed until all that had taken place had become a matter of history.

In the stone was placed a copper receptacle in which were put a copy of the by-laws of the local Masonic lodge, a copy of the proceedings of the Masonic Grand Lodge, a history of the free library prepared by Miss Smith, the librarian, and copies of each of the local city papers. A copper talkman was also placed in the urn, symbolic of ancient customs in Masonry.

Music was furnished by a double quartette, the National air "America" being sung.

When the thought comes that the matter placed in the corner stone Saturday will not be disturbed or be disclosed to the eyes of mortals for a hundred years or more, considerable more than ordinary interest is attached to the ceremonies that marked the laying of the stone by the Masons.

Work on the handsome structure will be rapidly pushed from now on.

T. J. Bowles Dead.

T. J. Bowles, father of Fred Bowles, a well known farmer of the Town of Crescent, died last Thursday, the 29th, at Spokane, Wash. The remains were taken to Oshkosh where interment will be made today. He was about eighty-four years of age, and prior to taking up his home in the west, was a resident in the southern part of the state. For four terms he represented Green county in the assembly. He had often been a visitor here. Fred, Bowles and wife departed Saturday for Oshkosh to attend the funeral.

DOINGS AT HIGH SCHOOL

(BY DOUGLAS ANDERSON)

The football game scheduled with Antigo for Saturday has been cancelled, Antigo deciding not to have a football team this year. Answers from different places are hourly expected and in all probability a game will be scheduled with some team for Saturday.

Preparations for the first literary program which will be held two weeks from the coming Friday has already begun. The program will include all members of the senior class and a model program is expected.

The increasing number of reference books used in the various studies has made it necessary to add another bookshelf in the main room.

A class in composition will soon be organized as a sufficient number have requested that the study be taught.

The class in physical geography is now studying the subject of light, magnetism and electricity.

Quite a number of High school pupils attended the teachers' institute Friday and Saturday.

The physics class began to transfer experiments into the permanent notebook yesterday.

The regular monthly examinations will be held the latter part of next week.

Three new scholars were enrolled this week making the total number at present 101.

The English literature class is now reading Spencer's "Farlie Queen."

A Royal Slave.

Many of our theatergoers will be pleased to learn that the play "A Royal Slave" which was presented here last season has been secured for a return engagement. It will appear here Thursday Oct. 8. It is safe to predict a full house for them as the company is one of the best that ever played Rhinelander and gave a splendid production. A better play has not been presented on a Rhinelander stage. Do not miss it. Next Thursday night.

Death of Mrs. Haviland.

The death of Mrs. Haviland occurred early Saturday morning at the home of her son, Wm. Haviland, on the south side. Her death was the direct result of cancer of the stomach with which disease she had been a sufferer for many months.

Deceased was sixty-seven years of age and of Canadian birth. Since early last spring she had made her home in Rhinelander and during that time acquired a large circle of friends all of whom sadly feel her demise. A family of grown-up children is left, one of whom being Wm. Haviland of this city, and another Mrs. Arthur Middleton, formerly a resident here, but now living in Sault Ste. Marie. The funeral was conducted at four o'clock Sunday afternoon from the house, Rev. F. F. Wolfe officiating. Interment was made in Forest Home cemetery.

Celebrate Wedding Anniversary.

Mr. and Mrs. R. Buckle of the Sixth ward celebrated their fifteenth anniversary Tuesday evening at the home of Mr. and Mrs. J. A. Bruns. A most enjoyable time was had, there being about twenty-five friends present. Among the number were Mr. and Mrs. A. A. Boake of Fond du Lac who came up especially to extend congratulations. Mr. Boake is a prominent contractor and builder at Fond du Lac and is still here. He expressed himself as very well pleased with our city and its prospects.

LICENSE NOT REQUIRED

Wisconsin Supreme Court Decides Against City in Case of Wausau vs. W. H. Heidemann, a Retail Agent.

The following article taken from the Milwaukee Journal of last Tuesday touches on a ruling of the Supreme Court that will affect several of our business houses. Heretofore agents have been required to pay license fees to the city and in one or two instances the representatives of the city retail stores have not seen fit to display their goods. We append the article:

A person taking orders for goods by sample, the business house itself executing the order thereafter, cannot be required to take out a license as a transient agent, according to a decision of the supreme court in the case of the city of Wausau against W. H. Heidemann.

Mr. Heidemann was agent for the T. A. Chapman Co., Milwaukee, and he sold orders for merchandise by sample, payment being made direct to the Chapman Co. at Milwaukee.

The city of Wausau, under its ordinance, asked \$25 a day license, and won a verdict in the lower court for \$125 covering five days of operations by Heidemann. The case was appealed, and the decision of the lower court reversed, the case being remanded with directions in favor of Heidemann.

The case is of great importance to Milwaukee retail houses, which do much "sample order" business in the state.

TO ESTABLISH CAME PRESERVE.

E. S. Shepard Contemplates Fencing in a Twenty-Five Mile Park.

E. S. Shepard had the misfortune to break the little bone in his left leg a week ago Friday. Dr. Packard set it and put on a plaster cast and Shepard is limping around in it without crutches. He occupies the position of snake editor in this office and we hope his misfortune will insure to our benefit inasmuch as he will now have more time to attend to his particular department. He recently bought the two badgers of the Polly boys and has another one he bought of Mr. Bennett of Rossett. He intends to keep on adding to his menagerie and ultimately have a wire fence put up around a game park, location for which he will decide upon the coming spring. He has five miles of 12 gauge wire to make a 10 ft. fence with 64 strands, with pickets one foot apart and a special machine made by the Holly, Mich. Woven Wire Fence Co. to make it with. He also has a stock fence machine for a 4 ft. fence and two miles of wire for that also. He has been gradually accumulating this material for the last two years, buying when the wire was cheap with a view of fencing a twenty-five square mile tract off for a park, land for which he has nearly enough now purchased. Moose, deer and other wild animals of Northern Wisconsin will be accommodated as well as the flock of hawks he has been raising. Stewies to the undertaking as it is a profitable as well as an educational venture. The land will not deteriorate in value anyway and as there are many fine lakes within the boundaries of his park territory it certainly will be an interesting place to visit and a capital spot for an outing in time to come when game becomes scarce.

Millinery Opening.

Mrs. C. O'Brien is having her fall opening today and tomorrow. She has a fine line of pattern hats on exhibition and also shows many handsome ones made in her own work room. She will give her patrons the same good work she gave them in the spring and guarantees satisfaction in every order.

NEW NORTH.

ROBINSLANDER PRINTING CO.

ROBINSLANDER. - WISCONSIN

Some eastern scientists have figured out that all life began at the north pole. A good deal of it has ended in that vicinity lately.

Now that the X-ray has been credited with restoring gray hair to its natural color the problem remains how to bottle it for the barber shop.

Eupatorium perfoliatum is the name of the new plant that is to supersede sugar cane and the sugar beet, being 20 or 30 times as sweet as either. When used in connection with table coffee and condensed milk it ought to be a great thing for piecemeal.

In the attempted trial of Prof. Langley's airship the only obstacle encountered was that it wouldn't work. Of course, the result was a great disappointment to the interested scientists, but it is believed that they will get used to this in the course of a few more trials.

The bacteriologists have discovered that the grip bacillus is the smallest microbe that affects man, which reminds us that the season for grip will soon be with us, and we can once more while away the dreary winter hours experimenting with more various cures for it that don't cure.

An agricultural fair has been held in Alaska, and the Yukon Horticultural Society points with pride to its garden products. Alaska can rival southern California or Florida in the production of semi-tropical fruits, but it bids fair to become self-sustaining of a large population.

Germany is now exporting more bicycles than the United States. American makers of wheels, who once commanded the markets of the world, have let the trade go away from them by failure to study the requirements of other countries for heavier, stronger and simpler machines.

It is a big wheat year in the United States, though the world's supply of grain shows a large deficit. This announcement comes from the Hungarian minister of agriculture, who is an authority on the subject, and it means that there will be a ready sale abroad at good prices for America's surplus wheat.

Utah was the appropriate place for holding the recent irrigation congress. That is where the irrigation movement first began in this country. Sixty-six years ago Brigham Young dug a ditch and induced the clear waters of City Creek to irrigate the alkaline soil of the land of Deseret, which now blooms and blossoms like the rose.

Within a few days two towns have had eminently typical American celebrations. Paterson, N. J., which was tried by fire, has been rebuilt and made more substantial and handsomer than it ever was before; so it took occasion to jolly over the fact. Galveston, Tex., was less Phoenix like, as three years ago it was practically wiped out by a tidal wave. But a new and greater Galveston has arisen from the wreck.

Apples are among the important agricultural products of the United States, which stands first in this specialty. The average annual yield in this country is about 176,000,000 bushels. Of course the total varies from time to time. This year promises to be a big one, as the trees in most apple producing localities are heavily laden. What is better, the fruit is said to be of exceptionally fine quality.

A Berlin dispatch says that Emperor William is formulating a plan by which graduates of some of the leading German universities will come to this country for post-graduate work, in return for the large number of Americans who go to Germany for that purpose. The idea is to form a sort of educational alliance by which each country will get the benefit of the other's methods. Emperor William is a very shrewd man.

A report of the bureau of statistics at Washington shows that the value of the tropical and subtropical products brought into the United States in the fiscal year 1923 was \$199,600,000, as compared with \$183,900,000 in 1920, and \$149,000,000 in 1917. This includes sugar, coffee, tea, rice and many sorts of fruits. In the ratio of consumption of some of these articles the United States stands at the head of the list among the countries of the world.

The Maryland Society for the Prevention of Cruelty to Animals has instituted a unique charity for animals in the shape of a home for aged horses. It consists of 50 acres of excellent pasture land about a mile from the city limits of Baltimore, well supplied with shade and water, where horses that have done good service but have become incapacitated for work by age are received and taken care of for the remainder of their lives. The phrase about "turning an old horse out to starve" has passed into a proverb. Humanity now cares for man's best friend in the animal line in a proper manner.

Whatever else may be said about automobiles, their sturdy qualities cannot be denied. They have crossed the American continent, traveling over every kind of road, and in fact at times running where there scarcely could be said to be any road; they have climbed great altitudes, including Mount Washington in New Hampshire; they have journeyed to the polar region over paths of tracks of ice and snow; they have done pretty nearly everything except swim the ocean, and machines capable of such achievements as these have probably come to stay for all time.

Promoters are not talking billions as much as they were. A day even passes occasionally without their launching forth into hundreds of millions. New Jersey's corporation business has shrunk immensely. The country is prospering as ever, but there is a steady squeezing out of water in extravagant schemes. Since January 1st 41 corporations have been organized under New Jersey laws have been put into the hands of receivers. They were capitalized at \$20,000,000. Their liabilities are \$17,000,000 and their entire assets—poor little reality—are only \$1,524,000.

A WEEK'S HISTORY

The Important Happenings of a Week Briefly Told.

IN ALL PARTS OF THE UNION

All the Latest News of Interest from Washington, From the East, the West and the South.

THE LATEST FOREIGN DISPATCHES

FROM WASHINGTON.

Ex-Congressman Edward O'Brien died at his home in Towanda, Pa., aged 71 years.

A proposition of the Hawaiian territory to secure a loan of \$1,250,000 for various public improvements is now before President Roosevelt for action, as required by the organic act.

In the United States there will be 55 fourth-class post offices advanced to the presidential class October 1.

Government crop report says that damage by frosts has not been serious. A majority of the corn is considered safe.

The time limit for ratification having expired, the canal treaty is dead. A new proposal is awaited by Washington.

Secretary Shaw announces that, owing to the scarcity of two percent bonds, both for circulation and as security for government deposits, he will renew refunding operations to the extent of \$20,000,000.

At a meeting in Washington the general executive board of the Knights of Labor adopted a resolution opposing the proposed war of union labor on President Roosevelt, and attributes the hostility to politicians who would disrupt the ranks of labor.

THE EAST.

To aid the movement for the infusion of New York city by Zion hosts, John Alexander Dowie, of Zion City, Ill., secured \$20,000.

Miss Annie R. Sharpley, who caused the post office authorities much trouble through her swindling operations in raising the figures on postal money orders in many cities, has been sentenced to the Eastern Pennsylvania penitentiary for two years.

In session at Baltimore the Sovereign Gland Lodge of the Independent Order of Odd Fellows unanimously elected Gen. M. A. Roney, of Monroeville, Pa., commanding general of the patriarchs militant for a term of four years.

On the Delaware, Lackawanna & Western railroad four section men were killed near Mount Morris, N. Y., by being struck by a train.

Fire destroyed the industrial center of the village of Gardenville, N. Y.

In Philadelphia William Macabee, of the United States naval home, celebrated his one hundredth birthday.

Prince Albert, at the Empire City track near New York, won against the world's pacing record of 1:59 held by Dan Patch and beat it most decisively, going the distance in 1:57.

In New York city republicans and citizens' union conventions re-nominated the entire fusion city ticket—Low for mayor, Grant for comptroller and Forbes for president of the board of aldermen.

At Fred Bank, N. J., Robert Allen, Jr., aged 70 years, a prominent lawyer, was found dead in a wagon house at his home with a bullet wound in his head. He is supposed to have committed suicide because of business troubles.

In the Wilkesbarre (Pa.) region orders for a restriction of the anthracite coal output have affected nearly all the collieries. Over 45,000,000 tons of coal have been mined since January 1.

The two hundred and third year of Yale university has begun.

In Buffalo, N. Y., Mrs. Jefferson Davis, widow of the president of the southern confederacy, is seriously ill.

WEST AND SOUTH.

At the age of 92 years Alonzo S. Sherman, who was mayor of Chicago in 1881, died at his home in Waukegan, Ill.

Near St. Joseph, Mo., four masked men held up a Burlington train, blew open the express safe, and are said to have carried from \$5,000 to \$10,000. None of the passengers were molested.

Burglars blew open the safe of the Baxter Springs (Mo.) post office and secured \$150 worth of postage stamps and about \$20 in money.

Flames destroyed nine business buildings at Appleton, Wis.

At the age of 57 years Charles B. Farwell, former United States senator, merchant and public man who had been a resident of Chicago since 1881, died at his country home in Lake Forest.

Flames destroyed F. B. Chase's sawmill at Morse, Wis., causing a loss of \$200,000.

Rep. Means of the Sixteenth Ohio district has nominated Caleb L. Weiss for congress.

In a close-fitting oil district of Texas five destroyed 25 derricks, causing a total loss estimated at \$125,000.

While resisting arrest at Mount Vernon, Ind., William Williamson shot and killed City Marshal Schwake. Charged by a posse the murderer took his own life before he could be captured.

At Monterey, Mex., yellow fever has broken out.

The officials of the Burlington Railway company and the Adams Express company have offered a reward of \$1,000 for the arrest and conviction of the men who held up a train near St. Joseph, Mo. Gov. Dockery has offered a reward of \$500 for each robber.

At Minneapolis 14 flour mills were closed because of a strike of employees.

At Marion, Ind., three men were killed by a collision of trains.

The date of the opening of settlement of the 20,000 acres of ceded Chippewa lands in Minnesota is November 10.

At Converse, Ind., Ernest Spitzel was instantly killed and Joseph Doddie was probably fatally injured by a Chicago, Cincinnati & Louisville train.

At Barton, O., a grand jury returned two indictments against George H. and P. N. Ford, bankers, who failed, with liabilities aggregating \$1,125,000. They are said to have accepted deposits after knowing the bank was insolvent.

Daisy, Dimple and Dot Redden, known as the prettiest triplets in the world, celebrated their twenty-first birthday at Buchanan, Mich.

At Cripple Creek, Colo., a writ of habeas corpus issued by the court against officers in charge of militia was ignored by the military, and a clash between civil and military authorities was averted by prompt intervention of the governor.

In Cincinnati Joseph Munzer, a theatrical manager, tried to kill members of "Marked for Life" company by shooting at them. He wounded three, none seriously.

In Georgia the cotton crop of this season is 1,075,000 bales, against 1,470,000 last year.

Burglars entered the state bank of Roberts, Wis., and secured more than \$3,000.

The Armour packing plant, which was destroyed by fire at Sioux City, Ia., last winter, is to be rebuilt at once.

President Roosevelt has approved the Hawaiian bond issue of \$1,250,000.

FOREIGN INTELLIGENCE.

The authorities in Bulgaria believe the question of peace or war in the Balkans will be settled within a very short time. The feeling is more hopeful in Sofia and the Turkish ministers are said to be near an agreement on disputed points.

England is made to realize that King Edward VII. is a ruler who means to rule by the victor with which he has taken hold of the cabinet situation and the African war and army scandals.

The Bulgarians still anticipate war and little confidence is felt in the sincerity of propositions made by Turkey.

In a fight at Kocakhan, 600 Turks were killed. The Turkish force numbered 7,000. After the fight the troops, enraged at their losses, pillaged and burned a number of Bulgarian villages.

LATER NEWS.

Two lives were lost and several persons were injured in a fire that destroyed the Hotel Brunswick at Rochester, N. Y. The dead are Mr. and Mrs. George Harwood, of Concord, N. H.

A. W. Macken will be the first person involved in the postal frauds to be tried, a practical agreement between the attorneys representing both sides to begin the trials in October having been reached.

A movement is on foot by the railroads of the entire country to bring about a general advance in freight rates, the general reason assigned being the big increase in the wages of all classes of labor and in the price of all material used by the railroads.

Dynamite was exploded under the buggy of Contractor Ferguson, of the Washburn railroad, near West Middleton, Pa. Ferguson was killed and his bookkeeper, Martin, was severely hurt.

The strike on the Great Lakes of the masters and pilots has been settled by arbitration.

A new Turkish cruiser named Abdul Hamid was launched at Elswick on the Tyne, England. She will carry 22 quick firing guns.

The sultan of Turkey asks that the American warships be withdrawn from Beirut. It is not thought the United States will consent.

According to a dispatch from Vienna, the Austrian emperor has decided to fight if the Hungarians push their opposition to his wishes to the extreme. The Austrian war minister and a number of officers have already gone to Hungary.

Bloodhounds have been put on the trail of C. Drivell and Harry Parry, who dug out of the O'Brien county jail at Primm, Ia. They were in jail for robbing Worth's store at Sheldon, Iowa, a month ago.

Sheriff Davidson, of Lynchburg, Tenn., saved the life of a negro by firing into a mob which was storming the jail. An unknown man was severely wounded.

At Middleboro, Ky., John Jones shot and killed Lawrence Duffy in a quarrel over 20 cents.

F. M. Hobbell gives \$5,000,000 to found a college at Des Moines, Ia. James Keffer was hanged at London, Wyo., for murder. He spent a large portion of his last night in singing, dancing and telling stories.

A negro was lynched near Whigham, Ga., for assaulting a little white girl. The government has decided to keep the U. S. warships at Beirut.

An unsuccessful attempt was made to kidnap Gov. Mickey's 8-year-old daughter at Lincoln, Neb.

W. A. Smith, a business man of Butte, Mont., was killed by the overturning of a tally-ho in which he was riding.

Robbers blew open the vault of the bank at Downing, Mo., but were frightened away without securing any money.

The creamery at Grand Rapids, Wis., was destroyed by fire.

A safe in the office of C. McDonald & Co., contractors at Thebes, Ill., was robbed from the building by burglars, taken from its contents, and supposedly dumped into the Mississippi river.

Patrolman Dennis Fitzgerald of Chicago was knocked down and beaten with his own club and then shot twice with his own revolver by two negroes whom he had stopped.

General Ota, leader of the band of insurgents which has been creating considerable trouble in the provinces of Albany, Luzon, has surrendered to the American troops, with twenty-eight officers and men of his command.

Thousands of visitors to Coney Island, N. Y., were thrown into panic by the escape from an amusement park of a lion which ran through the streets pursued by policemen and animal trainers until it was driven into a corner and secured.

Floyd T. Ferris arrived at Boston, Mass., by American express from Columbus, Neb., on the way to Lyons, where he is wanted, charged with the larceny of \$200 from the company which transported him.

TWIN CITY MARKETS.

Minneapolis, Sept. 24.
Wheat—No. 1 northern, 32c; No. 2 northern, 30c; Dec. 30c; Oats—No. 1 white, 25c; No. 2, 24c; Rye—No. 1, 30c; No. 2, 28c; Barley—No. 1, 25c; No. 2, 23c; Flax—No. 1, 25c; Creamery, extra, 12c; 2c; creamery, first, 10c; 2c; dairy, fancy, 10c; 10c; Poultry—Turkeys, 60c; chickens, 75c. REFUGEES MEET AN AWFUL FATE

Turks Set Fire to Forests in Which They Are Hiding.

HUNDREDS ARE ROASTED ALIVE

Petroleum Is Used for Firing the Woods—American Fleet Will Not Be Withdrawn from Beirut for the Present.

Constantinople, Sept. 23.—While the sultan is solemnly negotiating with the great powers of Europe about suppressing the horrors of Macedonia special trains loaded almost daily to the soldiers who are ravaging the condemned districts. The petroleum is used not only for burning villages, but also woods and thickets in which women and children take refuge. At Kirk, in the Kila district, a wood was fired and more than 500 women and children were either roasted or suffocated, or in trying to escape were caught and horribly tortured before they were killed. The soldiers who were engaged in the destruction of Smendek have led a new fashion by bringing back indescribable mementoes of the atrocities they perpetrated.

It is calculated that by the middle of

October there will be nothing left of Macedonia or Thracia to interfere about.

Germany is the sultan's great ally in pursuing the present policy, and the Bulgarian army, with its German officers, can be relied on to make victory easy for the sultan if war is forced.

New Outrages.

Monastir, Macedonia, Sept. 22 (via Sofia, Bulgaria, Sept. 23).—Show has fallen on the higher mountain ranges, and the refugees must either leave their hiding places or suffer the greatest hardships. The Turkish troops continue to slaughter refugees who return to their former homes at the invitation of the government, which promises them protection.

Near the village of Zlatan, in the neighborhood of Resna, troops found 15 returned refugees working in a field.

They bound their hands, drove them into a ditch, and massacred 14 of the peasants. One of them survived his wounds. The refugees women subsequently discovered the bodies and carried the survivor before the lieutenant governor of Resna, who refused to hear their story.

One hundred and twenty Bulgarians, including four priests who had been expelled by the Turkish authorities, left Monastir Friday.

Mobilization Ordered.

Salonica, European Turkey, Sept. 23.—The immediate mobilization of the Adana, Angora, Kastamonu and Kars divisions of the army, totaling 65 battalions, has been ordered. Half of these battalions are expected to arrive here within a week, and the rest will go to Adrianople.

Great Britain's Attitude.

Sofia, Bulgaria, Sept. 23.—A communication made by the British diplomatic agent to the Bulgarian government stated that neither government could count on Great Britain's support in the event of their openly or secretly opposing the realization of the Austro-Russian project of reform in Macedonia, and added that Great Britain was pressing Turkey for more effective application of the reforms. The communication further stated that Great Britain was consulting with the other powers as to the possibility of introducing more suitable remedial measures.

Withdrawal of Ships Unlikely.

Washington, Sept. 23.—Withdrawal of the American warships from Beirut seems unlikely for the present, in view of a cablegram received at the state department Saturday from Minister Leishman, at Constantinople, stating that although his advice from Beirut indicated that the situation is quiet just now, nothing like permanent order has been established. Mr. Leishman says that the state of affairs there may yet be regarded as uncertain.

Rear Admiral Cotton, commanding the

New Pacific Fleet.

New York, Sept. 23.—Prince Albert, the passing hero of a hundred races and the champion of a score of half-mile tracks, went against the world's pacing record of 1:59 held by Dan Patch and beat it most decisively at the Empire City track Wednesday, going the distance in 1:57.

Fear for Ship's Safety.

New York, Sept. 23.—Fears are entertained, says a Herald dispatch from Valparaiso, Chile, for the safety of the British steamer Laurel Branch, which August 29 started from Valparaiso for Europe and has not returned thus far at Valparaiso.

Jumped Overboard.

Cleveland, O., Sept. 23.—While the passenger steamer City of the Straits was en route from Cleveland to Detroit late Monday night a well-dressed man, aged about 47 years, jumped overboard and was drowned.

Furious Work Done.

New York, Sept. 23.—A private dispatch from Prague announces the death of Brother Karl, probably the most famous member of the Benedictine Order of monks. Before entering the cloister he was Prince Edwin Schomburgk, an officer of the Austrian emperor's guard.

Judge Drops Dead.

Huntington, Pa., Sept. 23.—Judge John M. Bailey, president judge of the Twentieth judicial district, dropped dead in his bathroom Sunday.

Paralyzed by Rains.

New York, Sept. 23.—A private dispatch from Prague announces the death of Brother Karl, probably the most famous member of the Benedictine Order of monks. Before entering the cloister he was Prince Edwin Schomburgk, an officer of the Austrian emperor's guard.

Jumped Overboard.

Cleveland, O., Sept. 23.—While the passenger steamer City of the Straits was en route from Cleveland to Detroit late Monday night a well-dressed man, aged about 47 years, jumped overboard and was drowned.

Furious Work Done.

New York, Sept. 23.—A private dispatch from Prague announces the death of Brother Karl, probably the most famous member of the Benedictine Order of monks. Before entering the cloister he was Prince Edwin Schomburgk, an officer of the Austrian emperor's guard.

FEELS A PRIDE IN HER GROWTH

Chicago Is Celebrating the Centennial of Her Birth.

CITY FILLED WITH VISITORS

The Festival Last Night Thursday Night—Her Growth in Her History by a Most Spectacular Representation.

CHALLENGE DECLINED.

Chairman Dick Announces That Senator Hanna Will Not Discuss Issues with Mr. Clarke.

Columbus, O., Sept. 23.—The reply of Chairman Dick of the republican state committee, to Chairman Salen, of the democratic state committee, declining the challenge of John H. Clarke, democratic nominee for United States senator, to a joint debate with Senator M. A. Hanna, was given out Sunday night. Chairman Dick says that Mr. Hanna's party has but one set of principles, while Mr. Clarke's party has a vast assortment of principles, sounding the entire gamut from doctrine to dogma, democratic, populist, agrarian and socialistic, and that

the day saw the centennial formally

begin. All the morning the tribes of visiting Indians, the Chippewas, the Potawatomis, the Winnebagoes, the Sars and Foxes, and the Ottawas, were the center of attraction while they raised their tepees and wigwags in Lincoln park. Under their chiefs they worked systematically in building a village at one typical and attractive. Many of the tepees were made of gayly stained canvas, while the wigwags were really shaped structures of woven mats and rushes.

Inauguration of Centennial.

The centennial was formally inaugurated at two o'clock in the afternoon by the dedication at the public library building of the Fort Dearborn tablet. Charles A. Hammond, chairman of the centennial executive committee, spoke the words of formal opening. The dedicatory gifts served also for the remainder of the tablets. The Fort Dearborn tablet will be permanent, the Kilo club announcing at the dedication that it would replace the temporary east with one of bronze.

The jubilee will last through Thursday night. Sunday was one of religious observance, the majority of Chicago churches recognizing the centennial by some form of appropriate service.

The Program.

To-day will be set aside for the historical side of the celebration. The Chicago Historical society will throw open its building at Dearborn avenue and Ontario street and in the evening will give a reception for which 2,000 invitations have been issued. Games and dances also will begin at the Indian village, being repeated each afternoon.

The descendants of John Kinzie, Lieut. J. S. Swearingen and Capt. John Whitaker, will hold a reunion Tuesday afternoon. In the evening will come the centennial parade, which is to be the most impressive event of the jubilee.

The packers will entertain the public on Wednesday and the equine sports will be begun in the afternoon at Lincoln park. In the evening the daughters of the American revolution will receive at Memorial hall. Thursday will be crowded with events. The old settlers will hold a reunion at Memorial hall in the afternoon. A banquet will be given visiting mayors at the Auditorium at six o'clock. "Golden Rule" Jones being among the speakers. At eight p. m. Mayor Seth Low, of New York will speak in the Auditorium theater on "Civil Life."

Strangers Flock to the City.

Already the city contains thousands of visitors, who took advantage of the low rates offered by the railroads for the celebration. Within a radius of 500 miles the majority of the roads offered one fare for the round trip, with good limit to the tickets, and on the opening day several of the roads were compelled to put on special trains to accommodate the visitors. The lobbies of the hotels were overrun, and the sleeping capacity of the hostilities was doubled by placing cots and extra beds in the rooms, yet still many of the downtown hotels were compelled to turn away seekers after accommodations. There is ample room for the comfort of the visitors at the outlying hotels and boarding houses.

The first detachment of official visitors to arrive was the Cleveland aldermen, 31 of whom came in during Saturday morning. Other detachments of city officials are expected from 20 different cities to-day, Tuesday and Wednesday. While the mayor's banquet does not take place until Thursday evening the visitors mean to avail themselves of the opportunity to see Chicago at their leisure.

Found Dead.

Chicago, Sept. 23.—Alexander Clark, a well-known lawyer, was found dead Sunday morning in the depot of the Wisconsin Central railroad at Antioch, Ill. A coroner's jury found that death had resulted from organic heart trouble.

Victim of Live Wire.

Chicago, Sept. 23.—Accidental seiling of a live wire on the roof of a barn on which he was playing with a companion Sunday caused the death of Ray Ealer, 13 years old, son of Edward Ealer, 242 Fifty-fifth street.

Of Interest to Artists.

Tom Browne, the English painter who has achieved wide fame, although still very young, was once an errand boy for a Nottingham lace-maker. Once when on a tour in Spain, unable to speak the language, he pictured his wants.

The portrait of the dowager empress of China, now being painted by Miss Kate Augusta Carl, an American artist, is to be placed on exhibition at St. Louis next year by the consent of her majesty, who, it is said, will also send other exhibits.

Tragedy in Indiana.

Bedford, Ind., Sept. 23.—Charles Cain, of Oolite, Ind., a small town near here, was killed and Frank Dorsey, proprietor of a restaurant, was probably fatally stabbed in the latter's restaurant Sunday afternoon during a fight between six young men who had driven here from Oolite and who it is claimed were using profane language and acting in an objectionable manner. Dorsey endeavored to eject them and was stabbed several times in the back. As Dorsey fell he fired, the bullet striking Cain in the mouth, killing him instantly. Two of the crowd are under arrest. Dorsey is in a serious condition.

Burns Proved Fatal.

Syracuse, N. Y., Sept. 23.—Mrs. Carrie Schrader died of burns received early Sunday morning in the Clover hotel, when she ran shrieking through the corridors, her night clothing a mass of flames. A guest extinguished the fire, and was herself badly burned. How Mrs. Schrader's clothing became ignited is a mystery.

Electrocuted.

Niagara Falls, N. Y., Sept. 23.—Lorain T. Wilmer was electrocuted at his home in this city Sunday. While searching in the cellar for the cause of trouble with the electric light wires, he received a shock of 2,000 volts. He was instantly killed.

Reward Offered.

Washington, Pa., Sept. 23.—Friday afternoon a reward of \$2,000 was offered by the county commissioners and the Ferguson company for the arrest of the guilty parties.

Telephone and Telegraph.

The deficit on account of the British postal telegraph is \$1,500,000 for the year.

Of the nine different systems of wireless telegraphy during the past year the one with the heaviest battery knocked the others out of tune.

The wireless telegraph comes just closed in Berlin declared unanimously in favor of making wireless telegraphy the business of the various governments as inland telegraph now is in Europe. This kills Marconi's hope of monopoly.

TRAIN PLUNGES FROM TRESTLE

Disaster Occurs on Southern Railway in Virginia.

TERRIBLE FALL OF 75 FEET

Five Trainsmen Are Killed Instantly and Seven Are Injured—Engineer Was Running at Too High Speed.

RHINELANDER PRINTING CO.

ADVERTISING RATES.

DISPLAY ADVERTISING.—For a contract of three months or less, twenty cents per column inch for each insertion.

FOR A SIX MONTHS CONTRACT, fifteen cents per column inch for each insertion.

IN ADDITION TO THE ABOVE, ALL COMPANIES in display advertising, except those who pay per line, will be charged for at the rate of thirty cents per hour.

READING NOTICES.

FRANKS NOTICES will be charged at the rate of five cents per line for each insertion and five cents per line for each subsequent insertion.

ALL NOTICES will be charged for at regular rates except notices of church services.

DEATH OF JACOB SCRAM.

The aged father of Mrs. George C. Pingry, passed away Tuesday morning.

At the advanced age of 84 years, 6 months and 10 days, Jacob Scram, father of Mrs. George C. Pingry of this city, died at the family home on the south side Tuesday at an early hour. Deceased was born in New York state and was one of a family of several children of whom lived to an advanced age. After moving to Wisconsin, he settled down in Winnebago county where he resided for many years. He later went to Minnesota where he lived for some time, coming to Rhinelander about two years ago. Since his arrival here he had made his home with his daughter. During the early part of his residence in this city he was often seen on our streets and got about with the ease and alacrity of a much younger man. During the past year however he became very feeble and was obliged to remain in doors, stirring around but little. Within the past two months he had been confined for the most part to bed and it could be seen by those in attendance that his life was slowly ebbing away. Besides Mrs. Pingry, the dead man leaves a son now residing in the east, and several grandchildren and great grandchildren, a number of whom live in Rhinelander. The funeral was held this afternoon at three o'clock from the M. E. church, Rev. Wiltse officiating. Burial was made in Forest Home cemetery.

The Times is assured on the best of authority possible that the Hon. E. A. Edmunds, late active champion of the La Follette cause in this country, has forsaken his chief and announced his purpose to heretofore affiliate and harmonize with the so-called stalwart wing of the republican party. Thus one by one they pass away.—Gillett (Ontario Co.) Times.

ADDITIONAL LOCAL NEWS

Olaf Rosen was at Eagle River Friday.

D. M. Hyde of Appleton was in the city yesterday.

G. P. Kraft, the Mercer mill man, was in town Tuesday.

Mrs. Ellen Miller left last night to visit with her daughter, Mrs. Colon Hutchison at Antigo.

Miss Katie Gotterman of Merrill has accepted a position as dining room girl at the Rapids House.

Rev. John LeJung went to Eagle River Saturday where he on Sunday conducted services in the German Lutheran church.

Jud. Brazel of this city is superintending the work of installing an electric light plant in Mather Bros. sawmill at State Line.

Charles State, the North-Western line's car repairer here, went up to Woodruff yesterday where he attended to several bad order cars.

Henry Sherry of Neenah was registered at the Rapids House Tuesday. Mr. Sherry is interested quite extensively in land located in this part of the state.

Andy J. Wilson, who holds a good position with the McKeljohn & Hatton Company at New London, was up during the fore part of the week looking after business matters and greeting friends.

Rev. D. C. Savage of Dunbar was in Rhinelander calling on his old acquaintances during the first of the week. Rev. Savage has been spending a good share of the summer over in Barron county.

Frank M. Rogers, a prominent business man of Minneapolis, was noted on our streets Tuesday. He has many friends among Rhinelander people and is a member of Lodge 27, B. P. O. E. of this city.

Next Sunday evening service at the Congregational church will be largely musical. Special numbers by the choir are in preparation, including solos and a ladies quartette. The pastor will deliver a short address.

Stanley Lathaw departed last Saturday for his home in Wausau for a short stay. From there he goes to Madison to enter the Wisconsin University. Mr. Lathaw has been stationed here for several weeks representing a life insurance company and working on a city directory.

Elmer Danfield has given up his position with the firm of Spafford & Cole, and will during the fore part of this month enter into the employ of H. Lewis, in that gentleman's clothing store. Mr. Danfield is the oldest clerk in Rhinelander, having been connected with the Brown Bros. and Spafford & Cole stores for twenty years. He bears the distinction of being the only man in the city who has been in the employ of one concern for so long a period of time.

REAL ESTATE TRANSFERS.

Recorded With the Register of Deeds for Week Ending Tuesday, Sept. 29.

Following are the real estate transfers in Oneida County for the week ending Tuesday, Sept. 29, as recorded in the office of the register of deeds:

Augusta Cressler to L. O. Larson, Lot 2, Block 1 of Cedar, \$100

Twenty lady friends of Mrs. E. Shaffer gathered at her home on the south side last Saturday evening taking her by surprise. Lunch was played until late in the evening when a palatable lunch followed. Before leaving the ladies presented their hostess with two pretty parlor rocking chairs.

Will Davis, who for some time has been in the employ of the "Soo" line as fireman on freight runs will when the division change is made here be given the position of locomotive dispatcher at the round house. The promotion is a good one and greatly appreciated by Will, as he will now be at home.

H. E. Schellenger has been given the position of day foreman at the "Soo" round house here. Mr. Schellenger will have charge of all locomotives installed in the big house and will have supervision over a number of men. He has been connected with the "Soo" road here for the past two years and is a valuable and competent employee. His friends are all glad to learn of his advancement.

Mrs. A. D. Daniels arrived last Saturday from a visit in New London.

B. L. Horr and Claude Shepard were business visitors in Wausau Thursday last.

Agent W. C. Riner of the North-Western spent Sunday with his family in DeSmet, Mich.

James Gillhouse, porter at Harry Prior's barber shop, returned Sunday from a visit of a week at his home in Antigo.

Miss Pearl Olinde spent the latter part of last week at North Cranston where she had charge of a millinery display for Mrs. C. J. O'Brien.

John Jennings, who has held a position at Duon's south side grocery for a couple of years, resigned Saturday. His place is now filled by Walter Morrill.

I have houses and lots for sale on easy terms in every part of the city. Anyone with city property desirous of selling are requested to call or write. MATT STAPLETON, 19-11

Preaching services both Sunday morning and evening at the Baptist church, morning sermon in the English language, evening sermon in the Swedish tongue.

Thomas Melody resumed his duties as engineer on the North-Western switch engine Monday morning after a lay-off of over a month. Angus McKinnon, who was filling his place, left for Antigo Saturday night.

Charles Hall, Ed. Markham and Will Rheume were visitors in Eagle River Sunday. The journey to and from this city was accomplished on their bicycles and the trip going was covered in three hours.

George Abbott departed Monday morning for Wausau, where he will spend the fall and winter months in attendance at the business college. For some time past George has been in the employ of W. B. LaSelle at the Rapids House.

G. Philip Sauer, who for several months has held a position in Cruse's Dept. store as floor manager and window decorator, resigned Saturday and departed Monday morning for Sheboygan to work in one of the leading department stores there.

The boxing contest at Hurley last Wednesday evening between Jack Glenn of this city and Harry Falls of Hurley ended in the sixth round when Falls was awarded the decision on a foul by Glenn. The fight was an interesting one and both men put up a good showing in the ring.

Charles McAllister, who is interested in the lumber traffic in the state of Alabama, arrived in Rhinelander last Saturday morning to make a short stay among his old time acquaintances. Charles made this city his headquarters up to a couple of years ago when he moved to the south.

Wm. Knekehm arrived in the city Sunday night from a trip of five weeks through the Lake Superior regions. During the greater portion of his stay he was located at Superior and Duluth. He left the fore part of the week for his home near Malvern where he will spend the fall.

Prof. J. W. Livingston of the Stevens Point Normal school was in the city Friday assisting in the conducting of the county teachers' institute. Mr. Livingston is an educator of rare ability and of much prominence throughout the state. He has been connected with the Stevens Point Normal for some years.

The five-year-old daughter of Mr. and Mrs. Marilla Raymond, North side residents, died early last Saturday morning. The little one was recently ill with diphtheria, but had apparently entirely recovered when she suffered a relapse and death followed. Burial was made that forenoon in Forest Home cemetery.

Rev. F. F. Wolfe delivered his farewell sermon to a good sized congregation in the Free Methodist church last Sunday morning. He expressed regret that he was obliged to leave Rhinelander and said that there would always be a warm spot in his heart for this city and its people. He preached his last sermon at Monico Monday evening.

The remains of Mrs. Carl Ulrich of Wausau, whose death occurred last Thursday in that city, were brought here Saturday afternoon over the North-Western road for burial. The funeral was conducted that afternoon at three o'clock from F. A. Hill-debrand's undertaking rooms and interment made in Forest Home cemetery beside the grave of her son. The body was accompanied here by the husband and other relatives. Mrs. Ulrich at one time resided in Arbor Vitae. The cause of her death was consumption.

Dr. Garner attended to a sick call at Monico Tuesday.

Mrs. C. J. O'Brien is having her fall opening, beginning today.

A. F. Schellmann was on the sick list a few days of last week.

E. S. Shepard drove to Merrill Tuesday where he transacted business.

Mrs. Spencer of Waupaca is visiting her daughter, Mrs. E. O. Brown, in this city.

Frank Jolin was numbered among the sick last week but is now able to be around again.

Mr. and Mrs. Chas. Ericson were down from Lac du Flambeau on a short visit last Monday.

Miss Alta Crofoot came home Monday after spending the summer among relatives in Fond du Lac.

Mrs. W. H. Williams returned to her home in Neillsville Saturday after a two weeks' visit with north side relatives.

For Sale—Six-year-old horse also new buggy. Can be seen at Charles Crofoot's barn. Will be sold cheap for cash. 61-11

M. F. Morris of Black River Falls was a visitor here Monday. The gentleman is interested in Oconto county farming lands.

The Congregational Ladies Aid Society will meet next Wednesday afternoon, Oct. 7, at the residence of Mrs. A. G. Wilson.

Olof Rosen, the Blue Grass Land Co.'s local representative, went up to Ironwood, Mich., Tuesday afternoon on a short business trip.

Miss Anna McDermott of Jefferson, this state, has accepted a position in the hosiery and underwear department at Cruse's store.

The public and parochial schools were closed last Friday so as to enable the teachers to attend the teachers' institute at the high school.

Russell L. Abbey, clerk at Crofoot's west side grocery store, returned Monday afternoon from a two weeks' visit at his home in Fond du Lac.

Mrs. Chas. E. Cruse departed Tuesday morning for Flint, Mich., her old home, where she will remain until about Christmas time with relatives.

Mrs. A. C. Danielson and children came home Tuesday from a visit of many months' duration at her old home in Sweden and other European points.

Miss Elsie Gilligan and sister, Mrs. Bishoff, returned Monday from a visit of five weeks at their home in the southern part of the state, including Fond du Lac, Sheboygan and Milwaukee.

Miss Ada Melroe came home yesterday morning from Ironwood, Mich., where she has been for the past two months visiting with her sister, Mrs. Peter Meagher, and friends.

Dr. Daniels and Chas. E. Morrill left the city last Friday morning for the western coast states, where they will be for some time looking over timber in which the doctor is interested.

Walter Schellmann, Will Abbott and Brooks Edwards spent a couple of hours yesterday morning between trains at Lake George and in the afternoon were visitors at Woodruff and Minocqua.

Mrs. George Reed of Houghton spent Sunday and Monday here with her sister, Mrs. Al. Huber. She was on her way to Iowa to make a visit with relatives. Mrs. Reed was formerly Miss Vera Shields of this city.

Mrs. Bishoff and little daughter Lola left Tuesday afternoon for Ashland, their home, after having made an extended visit at the home of Mr. and Mrs. W. H. Gilligan. Baby Bishoff has been here since the fore part of the summer.

Rev. Wolfe came up from Monico Tuesday to secure a grip containing valuable papers which he forgot in packing. The grip was missed before Mr. Wolfe reached Monico and he was obliged to stop off and come back on the next train.

Philip Martell, who for nearly two years has been located at Minneapolis, arrived in the city Tuesday morning to visit with his parents and other relatives on the south side. At the Hour City Philip holds a good position in a cash and door factory.

Frank Leannan, who during the summer has been the fireman on the "Soo" switch engine in the local yards here, is on a lay-off. His work is being done by Martin Handohls, formerly employed in the round house. Frank will go out on the road during the fore part of this month.

H. F. Jilison, the host at the new Hotel Northern at Monico, was up the latter part of last week visiting among his friends. Frank has not been a very frequent visitor here of late having been confined to his hotel business and superintending improvements which have been made about the property.

Mr. and Mrs. Thos. J. Owen were in from their home in the Pine Lake district Tuesday for a few hours buying a store of supplies. It was their first visit to the city for many weeks. Mr. Owen has about completed his harvesting and report a fair crop. His potato yield will be exceptionally good.

Work on the brick warehouse, which is now being constructed for the Lewis Hardware Company in the rear of the Merchants State bank building, is being rapidly rushed to completion and the structure will be ready for use before snow flies. The building is of ample dimensions, made entirely of red brick, and will present a neat appearance.

Dep't. Store

CRUSOE'S

NO GREAT EFFORT To save money on your purchases—to buy cheap. Here you get the saving prices without asking—all alike—the lowest prices to everyone—ALWAYS.

QUEEN QUALITY

The famous shoe for Women. Queen Quality shoes are made in fifty-two styles. Any style... \$3.00.

FALL GOODS ARE NOW ON DISPLAY.

BOYS' SUITS, REEFERS AND OVERCOATS.

We carry a nice line of medium grade clothing for boys and we know that our selections include some of the best wearing goods on the market in these medium qualities. Suits for boys of ages \$2 to 15 years at... **\$1.50 to \$6.50**

Reefers... **\$1.50 to \$7.00**

Big Boys' Overcoats for... **\$3.50 to \$5.00**

NIGHTGOWNS 75c.

Men's heavy outing flannel nightgowns—assorted colored stripes. Each... **75c**

Men's Fleece Lined Under-shirts and Drawers—the Best 50c we have ever sold. Each only.

Women's Wrappers made of flannel—the Banner Brand wrappers—well sewed, cut to fit... **\$1.00**

JACKETS The latest arrivals—women's gray Ziblene box coats, satin lined throughout with velvet collar and coat sleeves—a dressy garment for cold weather. Each... **\$9.00**

See the immense line of fur scarfs and buns we have hung up in the store. There are all kinds, colors and qualities and anyone can surely get suited here. The prices in many instances are lower than furs have ever before been priced here. They will soon be needed. We invite the ladies to look them over and advise selecting now while assortments are at their best.

OWN YOUR OWN HOME

STOP PAYING RENT.

The North Wisconsin Home Association will build you a home anywhere in America for the money you are now paying for rent.

The North Wisconsin Home Association charges you NO INTEREST on your money. The 75 cents a week is ALL you have to pay until your contract matures. As soon as your contract matures we give you the deed of your property in your own name. Save 75 cents a week and we will build you an elegant home for it.

Save 10¢ cents a day and for it we will build you a home that you will be proud of. Be your own boss in your own home. Stop paying rent. You receive nothing in return for it. Let your rent money be the foundation for a home of your own. The money you are now paying for rent would soon purchase a home of your own.

Take out a contract now and in case of sickness when your earnings stop, the Association will pay your installments. The North Wisconsin Home Association is a great co-operative partnership in which all the contract holders pay a few cents a week into the Home Fund and as fast as the money accumulates it is loaned out to the contract holders WITHOUT INTEREST. On a \$1,000 contract you pay 75 cents a week until your contract matures—no more or less.

You may purchase as many contracts as you wish. The earlier you take out a contract the sooner you own your own home.

Iron Clad Stockings.

Oh, mothers of all active lads, Fitting out with "Iron Clad." They will neither crack nor fade—Strongest stocking ever made. Triple knee and double toe. Made by Cooper, Wells & Co., At St. Joseph, Michigan, Always buy them when you can.

H E can play on his knees, He can climb all the trees, And holes in his stockings Will never be seen; He can hop, skip and jump, He can skin up a stump, If he wears Improved "Iron Clad No. 19."

SOLBERG & KOLDEN.

THE STORY TELLER

THE TELEPHONE

“Did you know I am of an elusive race,
Yet subtle is your human thought to reach
And none so subtle as bridges over the space
That else would drown your speech?”

By golly ye point along the void I go
To do your will with feet that never tire
Love's charmed cadence, musical and low,
Sings down the slender wire.

And then, the messenger of dull despair,
I find a word that chills me with its weight,
Or silent fingers come knocking thro' the air
And I am lost with hate.

Sometimes a greeting flies to reach the need
Of one who waits from all his kind apart,
And then across a continent I speed
To move a nation's heart.

The very day your clever cable span,
So round and round this globe I turn
To bring you nearer to his brother man
And make the nations one.

I am not what I am, has no man named
A spirit, wizard and stood with silver
To seek my face, and lo! I have returned
To that from whence I came.

Of old in vision, did the post-boys
Descend the shadow of a thing to be
They knew and named me for the coming
I still am, Mr. Morse.

—Alice Lake Cole, in Youth's Companion.

A Horseless Elopement

By BENNET MUSSON

Copyright, 1914, by The Story Book Co.

MAJ. FITZGIBBON sat on the veranda of his house in the little city of Brighton, in central New York, and watched a large steam roller, which rumbled ponderously and complainingly over the unyielding macadam of the broad, tree-lined avenue. This roller typified the manner in which the major, since his migration from Georgia, 20 years before, had walked roughshod over the complaisant inhabitants of Brighton.

The major's love for the south was coupled with an enterprise which—seemingly at variance with the southern character—had enabled him to dominate the small northern city commercially. The great factory which bore his name, and employed 500 workers, entitled him to be considered a magnate.

Fanciful comparisons were far from the major's mind as he watched the roller eddle the crisp May air with puffs of sooty smoke. The vicious twist with which he knickered his imperial indicated something serious in his thoughts.

The twist increased in violence as a handsome young man stepped briskly through the front gate and along the path which led to the veranda. The major rose with exaggerated courtesy.

“Good morning, Mr. Ingalls,” he said. “I have returned to—” began the young man.

“Permit me to offer you some refreshment, sir,” the major interrupted.

“DID YOU, OR DID YOU NOT, SAY THAT I MUST BE AN IMPOSTOR?”

ringing a hand bell, to which an old darky responded.

“Thank you, I—” Ingalls hesitated as the major's steely blue eyes fixed him piercingly. “I don't care if I do,” he concluded, lamely and colloquially.

When the servant returned and set out a decanter, a carafe, and glasses, and the preliminary courtesies of greeting were over, the most uncomfortable half-hour in Frank Ingalls's 25 years of life elapsed.

The major's only daughter, Helen, was the subject of the interview, and although the old man knew that some day he must lose a girl of her beauty and attractiveness, he did not propose to give her up to a man for whom he entertained small regard, and—principal cause of this lack of esteem—whose father had accompanied Gen. Sherman on his march to the sea.

When the interview had passed from formality to informality, then from heat to reconciliation, the major rose and faced his guest.

“Did you, or did you not, say, sir, that I must be an impostor, because there was no surviving officer of the confederacy under the rank of colonel?” he demanded, with dynamic politeness.

“In my younger days, before I knew and loved Helen, I may have made some such foolish remark,” Frank replied, apologetically, “but I apologize for it now.”

AID TO EXPLORERS

Wireless Telegraphy Will Enable Wanderers of Arctic Travelers in the Future.

“It will not be necessary in the future for arctic explorers to die from starvation because they are lost from civilization,” said Sir. Marconi the other day. “By means of the wireless telegraph it will be very easy for an exploring party to keep in daily communication with their home people. Every arctic expedition hereafter probably will be equipped with a wireless outfit. Should an explorer be so fortunate as to reach the north pole he can announce the fact to the civilized world. He can tell his friends at just what point he stands. If he is in need of supplies he can direct how these shall be forwarded to him, and of what they shall consist. He can announce how long he can wait for supplies to reach him, and can direct his rescuers how to reach him.”

Not on your account, but on my own,” he added, as the major smiled contemptuously. “As for your daughter, allow me to tell you that she is a northern woman by birth, sympathy and temperament, and I shall marry her in spite of you.” With which explosive statement, Ingalls stalked angrily from the yard, and the major, who liked an outspoken foe, followed him with a look in which resentment and admiration were strangely mingled.

For the two days that followed, the manner in which Maj. Fitzgibbon conducted a large manufacturing business and frustrated the attempted meetings between Helen and Frank showed a presence that was almost uncanny. His daughter's open defiance had rather aroused his regard, although he denounced it as undutiful and unseemly.

On the third day, after the interview the young people attended a clandestine meeting. Helen arranged to slip from her window that night, and repair with Frank to the house of the Unitarian minister, who, in addition to being a man of spirit and independence, was Frank's uncle.

At midnight Frank waited under a certain window in the Fitzgibbons' house until Helen appeared, clad in a blue traveling dress and an air of caution, and the moon obligingly retired behind a cloud while the couple went toward the gate.

As they reached the sidewalk there was a crash behind them of another window being flung violently open, and a crunching sound as two square-toed boots landed in a gravel path. Ingalls glanced back as he hurried the trembling Helen toward the main street, and the approaching boots ground the gravel maliciously.

As Frank again turned his eyes forward a huge, ghostly object loomed before him in the road. It was the steam-roller, covered by an enormous rubber cloth. Dashing to it, Frank pulled up the rubber cloth, lifted Helen into the cab of the machine, climbed in himself, and the folds of the cover had barely settled in place when Maj. Fitzgibbon clattered by, in futile pursuit.

As the pair drew a few breaths of relief, flustered with the odor of machine oil and coal gas, a responding sigh came from the lady darkness. This was followed by a slow grunt, then a voice of protest.

“What ye want?” it demanded.

“Why, there's someone here!” Helen cried, softly.

“Course 'tis I. What—” continued the voice.

“Ed!” whispered Frank. “Who are you?”

“Bill Duxton, the engineer. Who are you?”

As the man rose from the narrow seat on which he had been curled up asleep, the tiny cab was filled to overflowing with a faint scent of alcohol which suggested a reason for his presence.

Frank laid a friendly hand on the shoulder of Bill Duxton's coat and hastily told his story, while his mind worked rapidly in another direction. His other hand crept into one of his pockets, and when it was extended to Bill it contained a bank note.

“You have a fire?” Frank asked, as the engineer fingered the money.

“Keep 'er up a little,” answered the man.

“Can you run the roller with it?” Frank demanded.

Bill grinned appreciatively in the darkness. “Soon fix it so I kin,” he said.

“But it will make an awful noise,” objected Helen, on whom the situation was dawning.

“I kin run 'er kinder slow an' quiet,” Bill said, hopefully.

“Besides, your father is probably stirring up the police and the railroad people, and he won't be back soon,” Frank said to Helen. “It isn't likely that he noticed this machine, and if he sees it anywhere else he won't dream that we are in it.”

Bill Duxton lighted a lantern, casting a dim glow on a complication of wheels, levers and valves; attended to the fire, and in a few minutes the roller was in motion. The engineer lifted the forward part of the rubber cloth, propped his head and steered the machine to the Unitarian minister's house.

Even a mazzette may not annul a marriage, and Helen and Frank departed for their honeymoon, leaving the major a prey to gloomy emotions, which they wisely forbore to interrupt for two weeks. During that time the love and sympathy Helen had for her father suggested the best course for a reconciliation.

“He likes actions that are bold and straightforward,” she said to Frank.

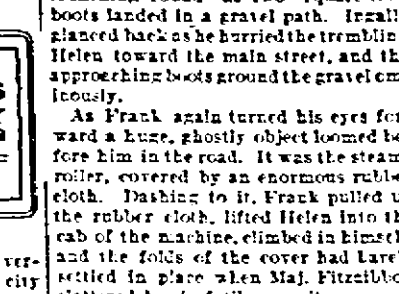

And the major got what he liked, for one morning, early in June, when he was again seated on his veranda, reading his paper before starting for his factory, he was aroused by a noise in the street.

An enormous steam roller turned in at the major's gate and moved ponderously along the driveway. At the throttle was Bill Duxton, and behind him, on the narrow seat of the machine, were Helen and Frank. From all parts of the roller flattered streamers and bows of bridal ribbons.

After gazing fixedly at the shy but confident couple, and at the abashed engineer, Maj. Fitzgibbon glanced back at his house, in which he had spent a lonely fortnight, and stroked his imperial with a soft, caressing movement. Then he walked slowly to the machine, lifted his arms, and Helen leaped lightly into them.

As Frank alighted and smilingly watched this scene, Bill Duxton turned the steam roller, which, with a triumphant look of its small whistle, rumbled dignifiedly away.

THE WOLF AND THE LAMB.

Find Another Wolf.

A hungry Wolf one day saw a Lamb drinking at a stream, and wished to frame some plausible excuse for making him his prey. “What do you mean by muddying the water I am going to drink?”

“I should be sorry in any way to displease you; but, as the stream runs from you towards me, you will see that such cannot be the case.”

“That's all very well,” said the Wolf; “but you spoke ill of me behind my back a year ago.”

“Nay, believe,” replied the Lamb, “I was not then born.”

“It must have been your brother, then,” growled the Wolf. “I cannot have been; for I never had any,” answered the Lamb. “I know it was one of your lot,” rejoined the Wolf, “so make no more idle excuses.” He then seized the poor Lamb, carried him off to the woods and ate him.

MUD VOLCANOES.

Strange Formation of Conical Mounds in Some Parts of the Old World.

Mud volcanoes are found in northern Italy near Modena, in Sicily near Girgenti, on the shores of the Sea of Azov and the Caspian, in Central America, and in other parts of the globe. The gas frequently escapes from them with such violence that mud is thrown into the air to the height of several hundred feet. Sometimes this gas is inflammable, consisting of sulphuretted hydrogen, hydrogen, or some hydrocarbons, and these gases occasionally take fire, so that true flames issue from the mud volcanoes, says Mines and Minerals. In other cases, the mud volcanoes appear to be formed by either hot or cold springs, containing large quantities of suspended materials, and the liquid mud issues from the vent without any violent eruptive action.

LIME IN THE OCEAN.

A Prodigious Amount of It Is Secreted by Various Forms of Submarine Life.

As the geologist wades about among the pools or follows the shore line at low water, he is impressed with the prodigious amount of lime segregated from the sea water by the superabundant marine life exhibited on all sides. Every pool, every rock, is teeming with life of some kind, and most of these organisms have secreted a certain amount of lime from the sea water to form their shells or their bones, internal as well as external, structure, says Mines and Minerals. Most of the pools are lined with so-called “sea mosses,” more strictly calcareous, fernlike corallines of pink or purple hues, the lime secreted by minute polyps. In addition to this there are many forms of algae, or sea plants, that secrete lime. Considerable masses of a structureless limestone are so formed in the bay of Naples.

Apart from the vast beds of sea shells we know to be secreted in the mud and sand, as well as those shells like the alabone found under the rocks, an enormous amount of segregated lime is represented by various forms of crustacea, particularly of the worm or annelid family, increased in tubes of lime. These tubes cover the floors of caves, while the walls are still more densely coated with limpets and rock barnacles, while in the crevices hundreds of little crabs crawl about and menace you with suspicious eyes and formidable claws, and hermit crabs carrying their whole shell home on their backs swarm in the pools.

With such a teeming superabundance of lime gathering life, the mingling geologist no longer wonders at the vast amount of limestone he meets with in the marine rocks, in which his blanket veins of lead and silver are found, as at Aspen and Leadville, Col., and throughout the world generally wherever lead abounds. He sees now how it is that he occasionally finds a fossil sea shell in the limestone walls of his mine, and only wonders he does not find more. In mines farther east he would find the limestone composed of nothing but a mass of sea shells. Deposits of comminuted shells and coral sands, thrown up on shore by the stormy waves, may be cemented into a compact rock, or limestone, by the redeposit of carbonate of lime between the fragments. In such a way is formed the “shell limestone” of Florida, and doubtless many of our old fossiliferous limestone were formed in this way.

HIGH CRITICISM.

Once upon a time an ambitious theatrical manager paid a large price for a play, and at a great expense prepared it for production on the stage.

On the opening night he was very anxious, indeed, and with palpitations of heart watched for the first evidence of its effect on the audience.

There was quite a suspense, and then the anxious manager saw that the play did not meet the approval of the gallery gods. He tried to win their favorable criticism, but could not, and the rest of the house taking its cue from the gallery, the play was an absolute failure and had to be withdrawn at great loss.

Moral—The most potent criticism comes from the higher circles.—N. Y. Herald.

Good Comparisons.

Ida—Helen said she was going out on the beach to pick up shells. Looks to me like she was going to pick up a dude.

Belle—Well, dudes and shells are very much alike.

“How is that?”

“Nothing in them and easily broken.”—Chicago Daily News.

The Ungrateful Deacon.

Mrs. Furrow—That Deacon Whitehead is an ungrateful soul.

Mr. Furrow—What's the matter with him?

“Why, he prayed for rain; his prayer was answered; he forgot his umbrella, caught cold and blamed it on the Lord!”—Yonkers Statesman.

Feasible.

“Did those mining stocks prove to be a good investment?”

“Yes,” answered the hard luck man, “for the people who sold them to me.”—Washington Star.

How to Kill Them.

Quinn—Miracles is also fatal to mosquitoes. It is a plant. We presume, remarks the funny man of the Chicago Tribune, you catch the mosquito and whisper the name in its ear.

Quinn—You have seen Jones' wife, what is she like? Should you call her pretty?

For—I might if I were talking to Jones.—Stray Stories.

POLICIES FOR A PENNY.

Insurance Certificates Are Issued Through the Medium of Slot Machines in London.

It will shortly be possible to obtain an accident insurance policy by means of a penny-in-the-slot automatic machine, says the London Express.

Penny-in-the-slot insurance is not a new idea. Two years ago a machine was devised which issued insurance policies against accidents for the sum of one penny, but unfortunately it proved to be an invitation to fraud.

The machine left it to the honor of the purchaser to write on the ticket the time and date of purchase, and many tickets were bought after the accident.

This difficulty has been overcome by an invention which has the appearance of a clock in a glass case and which was on view recently.

When the penny is dropped into the slot and a handle drawn forward, a sharpened pencil drops out and an opening is disclosed upon which the customer signs his name. The handle is then pushed back, the space closes, an insurance policy is issued, and against the signature inside the machine is printed the date and exact time of issue. If the purchaser meets with an accident within seven days of the issue of the policy he applies to the law accident insurance society, and if his name is on the register he receives a weekly allowance for five weeks. Anyone will be able to insure up to the amount of his weekly wage—each penny invested providing ten shillings per week.

Attached to each policy are four coupons, and on presentation of these to tradesmen in the neighborhood of the machine a discount of 1 penny in the shilling on all goods bought up to four shillings will be allowed.

Thus the wise workman who is earning £2 a week will, after investing 2d. in the machine, hand his wife £1 19s. and 12 coupons instead of £2. The balance of 9d. he can give to the fresh air fund to provide one child with a day in the country. On this basis it can be argued that he gets his insurance policy for nothing and 2d. profit on each penny invested. It is proposed to place these machines in factories, warehouses and mills where large numbers of workpeople are employed.

TWO STOCK EXCHANGES.

Difference Between That of New York City and the Bourse of Berlin.

If any member of the New York stock exchange who is entirely unacquainted with German speculation should visit the Berlin bourse he would find at every point the most striking divergencies from his home experience. He would be surprised to see the bourse attended by quite 2,000 persons, including clerks of banks, newspaper men, and even visitors like himself, writes William C. Dreher in “The Berlin Bourse” in Century. Also he would be interested in the immense size of the hall—200 feet long, divided by colonnades into three sections, one of which is assigned to the produce exchange. On one side of the hall several doors open into a grassy court, shaded by trees and surrounded by a pillared lobby, where brokers sit in dull summer days and float their latest stock of anecdotes.

That shaded court is suggestive of deeper differences between the New York stock exchange and the Berlin institution. In New York the number of members is fixed and is small in proportion to the immense volume of business done; in Berlin there is a great horde of small dealers, and the amount of trading is much less than in New York. Owing to the easy terms of admission, the bourse becomes a mere place where traders meet to effect their transactions. There is no sale of seats. In fact, no membership fee exists, but only a small yearly tax is collected, which varies from time to time as the expenses of the organization require. Contrary to New York practice, membership is largely held by companies and firms. Nearly all the banks of the city, for example, are members, and the more important ones keep above a score of their employees on the floor. Thus the individual New York broker, as a rule, counts for vastly more than a member of the bourse. New York is concentrated, intense; Berlin disperses its energy, and is comparatively dull. It knows nothing of those great days of triumph or disaster that render the annals of Wall street picturesque; and it lacks our large, daring operators, who startle the country with their bold schemes.

Know His Rights.

The two newboys had quarreled over the possession of six cents, of which the smaller boy insisted he had been defrauded.

They proceeded to fistfights, and the smaller boy was whipped.

“You licked me, all right,” he said, wiping his bloody nose with his ragged shirt sleeve, “but I'll fight ye again, if ye don't fork over two cents of dat money.”

“What fur?” demanded the other boy.

“Doggone ye, I got a right to claim de loser's end of de purse, kaint I?”—Chicago Tribune.

Old Coal Mines in England.

Coal workings around Cheddar, in North Staffordshire, England, have been traced back as far as the reign of Richard III. The early mining is explained by local geological conditions, as the coal seams—instead of being hidden under drift as in other parts of England—were brought to notice through dark streaks turned up by the plow. A late discovery is an old level that must have been driven at least 200 years ago for draining a coal tract.

More Paupers Than Ever.

During the quarter ended on June 20 the total number of paupers relieved in England and Wales was higher than in the corresponding weeks of the last four years, while in London the number of paupers reached a height that has never been attained since 1872.

A Fine Sense of Smell.

The aborigines of Peru can, in the darkest night and in the thickest woods, distinguish respectively a white man, a negro and one of their own race by the smell.

CHARMING FANCY WORK.

The Art of Tatting, So Popular in the Days of Our Grandmothers, Again Coming Into Favor.

There never was a time when lace was so much in request, and there is a renaissance of some of the older kinds, such as tatting, crochet and knitting. The only requisites for tatting are a bone shuttle, a crochet hook and coarse thread. In choosing the shuttle select one which has the two halves coming together at the points so as not to let the thread escape while working, and also that it shall not catch in the work. The two parts should just meet, so that the thread, in pushing through, should cause a slight click.

The two illustrations of the hands show the way the thread is passed round the hand and how the shuttle should be held. Having filled your shuttle with thread, take it in your right hand between thumb and first finger, take the end of the thread with your left and hold in position firmly with thumb and forefinger and pass the thread outward around the fingers, which should be spread out, and bring it round to the end and hold both with finger and thumb firmly, as in Fig. 1; pass the thread over to the left and bring the shuttle down on the right side of the thread, carry it under the thread and bring it up on the left side between the thumb and the shuttle thread (which was thrown over from the finger and thumb). This will make a single knot.

The spread fingers must now be relaxed and the shuttle thread held taut to bring the knot into position and so that the thread round the hand shall be over the shuttle thread and allow the latter to be drawn back and forth through the middle of the knot. This so far is only a single knot. Now let the shuttle thread hang loose on the right side of the thread around the hand and pass the shuttle on the left under the thread and bring up on the right, as in Fig. 2; relax the fingers, tighten the shuttle thread and carefully draw up close to the other single knot. Now you have a double knot. See that the shuttle thread comes through the middle; otherwise when you have all your knots made the thread would not draw, and it would, therefore, be no use.

I remember when a child picking up the stitch, but instead of making the knots with the thread around the fingers over the thread in the shuttle, I kept the thread around the fingers too tight and made the knot with the shuttle thread over it instead of vice versa. The consequence was I could make one hole and draw it with the

THE HANDS IN TATTING.

end of the thread, but, of course, could make no more.

When the shuttle is passed under the thread around the fingers the fingers must be spread and the thread held tightly around them. The moment the shuttle comes up on the other side the fingers must be relaxed and the shuttle thread held tightly. All the time, of course, the circle of thread around the hand is held firmly by the finger and thumb. The only way to do it is to try over and over again. Having once mastered this initial difficulty, the rest is easy.

For a simple trimming which can be used on the edge of tucks or ruffles attach two rows of machine stitching about a quarter of an inch apart and the same distance from the edge. Then, with a contrasting color, or the same color as the goods of Roman loss or heavy mercerized cotton, run the threads diagonally through every other machine stitch, which should be long. In order to permit the thread to run through easily.—Good Housekeeping.

The Complexion in Summer.

The maiden who tans becomingly is a hard thing to find, while as for those who blister and burn on the slightest provocation their name is legion. It is well for the ordinary woman, therefore, to forego her desire for a healthy tan and take a little care of her complexion. Powder is a great protection against the ravages of the weather and above all things, the face should not be washed with soap and water at the conclusion of an outing. Peeled noses and blistered cheeks are almost certain to result from such treatment. Instead a cleansing cream should be liberally applied. If soap must be used, the mildest of paste soaps should be selected, with a little borax in the water, and a good skin food should be rubbed in the skin afterward.—Chicago News.

The Sun Spells Mirrors.

Do not hang a mirror where the sun shines, for the sun's rays acts on the mercury and the glass becomes clouded.

Cold Water Preserves Yolks.

Yolks of eggs left over when the whites have been used will keep for several days if placed in a bowl of cold water.

How to Keep Lemons.

Lemons will keep better in cold water than on a shelf.

NECKWEAR FOR AUTUMN.

Never Have There Been Greater Opportunities for the Selection of Pretty Styles.

Never has more attention been paid to the dressing of the neck by maid and matron than at the present time, and never have there been greater opportunities for the selection of becoming styles than in this year of grace. If it be the strictly tailored, mannish type of collar or scarf that is demanded, the dainty, frilly fascinating stock or cape or the immense array of simple pretty styles midway between these two extremes, and from which the majority of women make their choice, all tastes can be thoroughly satisfied with the output for this and the coming season.

If the spring and summer styles were attractive and delightful enough to tempt the average woman into extravagance, and make her sigh for an unlimited bank account, the fall productions are even more fascinating, for the good points of their predecessors have all been retained and some extra little touches added that give a distinctive and altogether alluring air. Some exceedingly pretty novelties have been brought out in stocks

NOVELTIES IN NECKWEAR.

showing fancy lace-like weaves and embroidered effects. Macramé is introduced to give the note of novelty, the stock itself in most instances being quite simple and plain, with a fancy tab in front edged with macramé and possibly a tiny tassel in addition. The tassel is the dominant new note in the fall neckwear, and some of the smartest styles are festooned all around with tassels attached to inlet motifs of some sheer material or soft silk. Considerable vogue is anticipated for macramé trimmed stocks and likewise for broad collars of this lace which is enjoying considerable favor at present in Paris.

Frige, in company with tassels and pendants, figures on many of the fall stocks, more particularly those fashioned from crepe de chine, and similar sheer fabrics and soft silk, and strikingly pretty effects are obtained with ornamentation of this kind in self or contrasting tone. These fringed stocks suggest the old-time jabot, but it is a glorified jabot, with none of the stiffness of the old-fashioned article. The turnover collar and cuff sets in plain and embroidered linen and the newer Tencel work appear in variety that is bewildering and it is predicted that later on these matched sets will be found in silk and chiffon prettily embroidered. In drawn work stocks are in many effective designs, and the macramé types are noticeable for their style and smartness. In the wash necks are included the numerous strips of embroidery or cambric which some women prefer to the tight-fitting stock, while the fancy lace collars are found in a practically endless collection, ranging from the dainty little stock to the elaborate shoulder cape with stole ends. Broad collars and collars with stole ends promise to receive marked attention during the coming season, and so, too, do soft scarfs of crepe de chine and lace materials, set off with decoration of Tencel fringes. So numerous are the new productions that but a hint can be given of their range and variety, but the accompanying illustrations represent a few of the newest and most distinctive models. Neckwear covers such a large field that the most exacting woman is sure to find that which will suit her fancy, and there is no excuse for the girl or woman who fails to obtain becoming stocks and scarfs and collars for the display for the present and coming season.—Brooklyn Eagle.

FISHMONGERING RAILROAD.

New Hampshire Line That Used to Supply Customers at All the Stations.

While looking through a pile of old papers the Exeter correspondent came across the following article in a New York paper of the date of February 6, 1859, under the caption of “The Smelt Railroad,” says the Manchester Union.

“It is well known that the Portsmouth railroad has to turn everything to account to pay running expenses, and many are the jokes they perpetrate upon the conductors in reference to their shifts to get a living. It is said that one of them last year was accustomed to bring fish from Portsmouth and peddle them out on the way to Concord.”

“One day he brought along smelts, dealing out to customers at every station, till he got to Suncook, where he blew his horn and an old woman came out and wanted six. ‘Just a pattern—all I've got left, you're in the nick of time,’ said he, and he began to count them and found only five. ‘How's this? I should have six,’ and he began to count his fingers, and reckon over how he had disposed of the four dozen he had started with. After awhile, ‘I have it; hold on a little while and I'll be back,’ said he; and he ran the train back seven miles to a place where he had let a woman have one more than she had paid for, got it, came back to Suncook and let the old woman have the six she wanted, and then the ‘smelt’ train went to Concord.”

Origin of Rain Water.

Every year a layer of the entire sea 11 feet thick is taken up into the clouds; the winds bear their burden into the land and the water comes down in rain upon the fields, to flow back through rivers.

When the Window Rattles.

If windows rattle at night a few folded slips of paper placed between the sash and the casing will bring peace and quiet.
